FEATURES AND BENEFITS

- Over 520 stunning materials, with robust menu of decorative, blackout fabrics, vinyl, plus over 250 screen styles.
- Featuring various screen styles ranging from simple contemporary screens to decorative screens. Including popular Mermet and Phifer fabrics, with wide array of colors, weaves and openness factors ranging from 1% to 10%. Many are flame retardant, bacteria and fungal resistant materials. Outdoor grade selections are also available.
- Elegant selection of textures, patterns, color combinations, and grass-like styles provide valued privacy, and gently filter incoming light.
- Many of our decorative patterns are now available in both light filtering and blackout materials. This is a great way to coordinate light filtering and room darkening shades throughout a home while meeting specific light control needs by room.
- Control options include beaded chain clutch control, TouchLift cordless and motorized control for complete hands-free operating ease and convenience.
- Three cassette valance options with fabric insert, neatly hide the shade when raised, providing a more finished, decorative appearance.
- Two fascia options in multiple painted colors, add a sleek and flat decorative appearance, while neatly hiding raised shades.
- Optional deluxe valance designed with clear edge groove holding matching fabric insert, and fabric valance mounted on a wood dust cover can both serve as stylish alternatives to cassette headrails and fascia.
- Bottomrail options include the standard fabric-wrapped rail, optional painted deluxe rail, flat deco rail, and a heat-sealed aluminum bar (fabric pocket style).
- Exterior shades feature corrosion-resistant components and exterior grade fabrics that can stand up to the outdoor elements.
- Panel Track and Roman Shades are available. See separate guide for information and pricing.
- Limited Lifetime Warranty ensures your customers' satisfaction.

* Heat sealed hem bar strongly recommended for R1015, R1019 & R1020

**Flat deco bottom rail (effective 5/20/2019)

Note: heat sealed hem bar is highly recommended with large shades for best shade appearance.

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

2-on-1 Shades Option: A Two-on-One shade is two shades under one continuous cassette valance. To price a 2-on-1, determine the price of each individual shade then add in the price of two individual cassette valances using the width of each shade. The total sum for the 2-on-1 shade is the sum of both shades and both cassettes. Clutch position only available on the outside of each shade (left shade - left side, right shade - right side).

NOTE: There is a 1/2" gap between the two shades. Please refer to the Product Size Specifications for individual shade sizes. Available with the Beaded Chain Clutch System & RemoteLift Motorization only.

Metal bead chain & Heat sealed hem are strongly recommended on shade size equal, wider than 108" or longer than 90", to improve the operation, and appearance of the shade, minimizing waviness, twisting, cupping & curling, especially on shades with railroaded material.

Spring assist clutch system (2-1/2" tube only) aids in raising heavy shades by reducing the pull force by up to 40%. Highly recommend on large shades greater than 44.4 SQ.FT. with shade width greater than 60". Please note Spring Assist is not available with cassettes or 3" fascia.

* Stainless steel bead chain is **REQUIRED** under skyline clutch when shade size is 108" x 90" and greater on patterns with *.

Heat sealed hem is strongly recommended on shade size equal, wider than 108" or longer than 90", to improve the appearance of the shade, minimizing waviness, twisting, cupping & curling, especially on shades with railroaded material.

STRONGLY RECOMMEND Heat Sealed Hem as the Bottomrail option for R1015, R1019, R1020 under 5% Sheerweave 5000 to improve appearance of the shade, and minimizing waviness.

Spring assist clutch system (2-1/2" tube only) aids in raising heavy shades by reducing the pull force by up to 40%. Highly recommend on large shades greater than 44.4 SQ.FT. with shade width greater than 60". Please note Spring Assist is not available with cassettes or 3" fascia.

2-on-1 Shades Option: A Two-on-One shade is two shades under one continuous cassette valance. To price a 2-on-1, determine the price of each individual shade then add in the price of two individual cassette valances using the width of each shade. The total sum for the 2-on-1 shade is the sum of both shades and both cassettes. Clutch position only available on the outside of each shade (left shade - left side, right shade - right side).

NOTE: There is a 1/2" gap between the two shades. Please refer to the Product Size Specifications for individual shade sizes. Available with the Beaded Chain Clutch System & RemoteLift Motorization only.

* Stainless steel bead chain is **REQUIRED** under skyline clutch when shade size is 108" x 90" and greater on patterns with *.

Heat sealed hem is strongly recommended on shade size equal to or greater than 108" x 90", to improve the appearance of the shade, minimizing waviness, twisting, cupping & curling, etc.

Spring assist clutch system (2-1/2" tube only) aids in raising heavy shades by reducing the pull force by up to 40%. Highly recommend on large shades greater than 44.4 SQ.FT. with shade width greater than 60". Please note Spring Assist is not available with cassettes or 3" fascia.

HARDWIRED MOTORIZATION

Hardwired Motorization is available with a variety of lifting capacities, "quietness", power options and control options.
Please see separate Hardwired Motorization Price List & Product Info Guide for complete details.

MOTOR READY

Dealer's Own Motorization

The factory will provide roller shade materials ready for Dealer or Automation Companies to motorize. These shades styles are also known to some as Motor Ready.

These shade materials are produced as follows:

Motor Ready Shades. Motor Ready shades are **PRICED** and **MANUFACTURED** to the "**net width**" specified by dealer. (Dealer is required to make all necessary width deductions to allow for motor and brackets being used, and order under **Mount Type: Exact End to End Mount.**)

- Factory automatically adds extra material length required for tube wrap at no additional charge.
- Dealer specifies tube size. (1-1/2" extruded ribbed, and 2" smooth at no additional charge. 2-1/2" extruded ribbed and 3-1/4" extruded ribbed tubes are available with applicable surcharge. (Contact customer service for surcharge information.)
- Motor Ready shades do not include notch on the tube, clutch, idler end, crown/drive, and brackets.
- Motor Ready comes with only tube, fabric and bottom rail with end caps.

OPTIONS AND FEATURES

Clutch Lift Continuous Control

Features continuous bead chain. When chain is pulled, the clutch rotates the roller tube lifting and lowering the shade. Chain bead stops set at upper and lower shade limits.

Defaulted Beaded Loop Length

SHADE HEIGHT	LOOP DROP
12" to 15 7/8"	2/3 of shade height
16" to 29 7/8"	3/4 of shade height
30" - 35 7/8"	24" loop
36" - 41 7/8"	30" loop
42" - 47 7/8"	36" loop
48" - 53 7/8"	42" loop
54" - 59 7/8"	48" loop
60" - 65 7/8"	54" loop

90" - 101 7/8"	84" loop
102" - 113 7/8"	96" loop
114" - above	3/4 of shade height

Note: Custom beaded loop lengths may be ordered, but they must be LONGER than the standard loop size for a given shade height (as indicated above). Loop lengths cannot be made shorter than the standard size because the shade will not fully operate through the entire range.

Plastic bead chains are available in the following colors:

- Black
- Bronze
- Vanilla
- White

Metal bead chain available at no additional charge in the following colors/finishes:

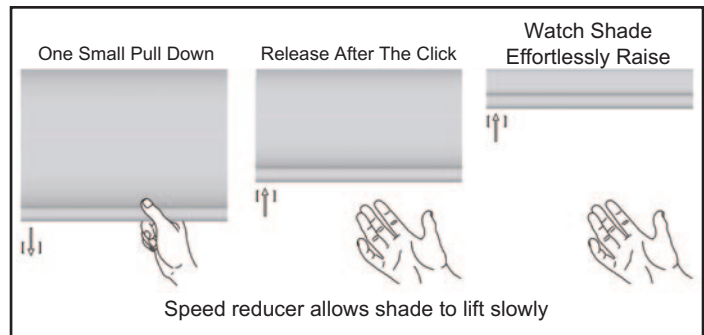

- Antique Brass
- Oil Rubbed Bronze
- Stainless Steel
- Nickel
- White
- Black

NOTE: We strongly recommend that all shades over 108" x 90" be ordered with a metal or stainless steel chain.

Stainless steel chain is **REQUIRED** on some heavy materials with shade size equal or greater than 108" x 90" under skyline clutch, please refer to price pages for detail.

TouchLift Cordless

- Shade lowers manually by hand
- Shade slowly raises automatically with slight pull on the bottom hem
- Shade comes pre-assembled on a mounting bar/rail. The rail and mounting brackets are available in white or black.
- Minimum shade width – 18"
- Minimum shade height – 24"
- Maximum shade size – **see Product Size Specifications** – **TouchLift** section for detail.

Inside/Ceiling Mount

Outside Mount

NOTE: TouchLift Handle only available with Fabric Wrapped Rail

PowerWand™ Motorization

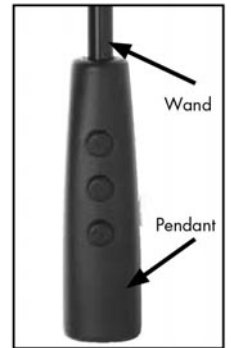

- PowerWand™ Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner.

PowerWand™ Rechargeable Shades Operation

- Press the up or down button on the pendant to raise or lower the shading to your desired position. No programming is required with PowerWand™ as upper and lower limits are set at the factory. If desired, upper and lower limits can be adjusted in the field.
- Please refer to the installation instructions for instructions on resetting the upper and lower limits and setting a favorites position can be programmed on-site.

PowerWand™ Appearance

- The PowerWand™ Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail.
- Pendant is 2-1/2" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerWand™ Options

- Wand is available in Black or White (there is no default)
- Wand is available in 1 foot increments from 1 to 5 feet (there is no default)
- Wand is available on either the right or left side of the shade (there is no default)

PowerWand™ Battery Life

- The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

Battery Charger

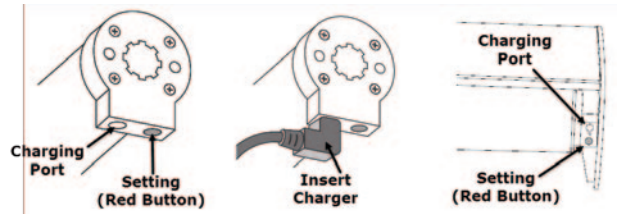

- 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering the PowerWand motorization option. The charger plugs into the charger port on the side of the pendant. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2-1/2" length x 1-3/4" deep.

SIMPLICITY RECHARGEABLE MOTORIZATION: OVERVIEW

Simplicity Rechargeable

- The Rechargeable Simplicity motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the inner tube.
- Rechargeable battery is included with the motor. The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis. The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger

- An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering Simplicity Rechargeable Motorized shade option. The charger plugs into the charging port of the motor. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2-1/2" length x 1-3/4" deep. Sold separately.

Solar Panel Recharge Option

- Plugs in to any Simplicity Rechargeable motorized shading (does not work with PowerWand). Provides constant trickle charge to 7.4v Li-ION Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.
- Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

5 Channel Remote

- The remote can operate up to five shadings simultaneously, individually or in groups. Remotes and holders are available in white or black. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

White
(Part #CS5138W)

Black
(Part #CS5138)

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. To set a "Favorites" position, follow instructions provided in the installation instructions.
- For best reception, it is highly recommended to keep the antenna of the motor exposed without come into contact with the metal to reduce interference of the reception.

REMOTELIFT™ MOTORIZATION: OVERVIEW

With RemoteLift™ motorized shades, enjoy a better quality of life and have more time to enjoy life's daily pleasures. At the touch of a button, window coverings can be instantly adjusted to changing activities or the varying sun conditions.

An ideal solution is to manage glare with a RemoteLift hand-held remote control. At the simple touch of a button, shades will open or close to adjust to the changing sunlight in a room.

RemoteLift Radio Frequency (RF) motorized shades provide ultra-quiet operation. The system can operate shades from virtually anywhere in the house without direct line of sight. Similar to how a garage door opener operates, radio signals travel through walls and make it possible to control multiple coverings throughout the home alone or as a group. The RF system is also available in a 5 or 16 channel version. The multi-channel RF system allows for independent control of individual shades and/or group control.

RemoteLift motorization systems provide many benefits, such as improving energy efficiency, providing easily controllable privacy and also enhancing home security.

The RemoteLift RF timer allows users to program specific times of the day to automatically adjust shades in different areas of the house, protecting interiors from the fading effects of direct sunlight. This feature provides added security to an unoccupied home by creating a lived in look even while homeowners are away on vacation.

The battery powered RemoteLift RF wireless wall switch allows shades to be controlled when entering or exiting a room, just like the lights. The switch may be seamlessly installed without wiring next to any light switch or stand alone, and is never misplaced. This one touch privacy helps create the ideal environment whether preparing for a bath, relaxing in bed or enjoying time with the family at home.

The Smoove® 1 RTS surface-mounted wall switch avoids cutting into drywall. This single channel, battery-operated solution is easy to install, and doesn't require an electrician. It's an intuitive, surface mount control.

The myLink™ RTS Smartphone and Tablet Interface is a WiFi to Radio Technology Somfy® (RTS) bridge that can control up to 5 channels of RTS motorized products using the Somfy myLink apps for iOS and Android devices. Through the app, users can send immediate RTS commands, create scenes (a group of motorized products working together) and schedules (timed events). Users may access their myLinks from anywhere with the app's remote access feature. Though the myLink is a single-zone controller, multiple myLinks can be joined within the same system for multi-zone control.

RemoteLift motorized shades are powered by Somfy, an industry leader in automated window coverings. All motorized products are backed by a 5 year warranty.

RAILROADING/MATERIAL SPLICING/SEAM PLACEMENT

Railroaded Material

The fabric is turned on its side, using width for length, to increase the maximum width available. Some fabrics cannot be railroaded due to pattern or construction.

For multiple shade orders, if one shade on the order is railroaded the factory will automatically railroad all other shades. This is done to ensure the pattern direction will be the same on all shades.

Splicing (Seam Placement)

Custom Splicing (Seam Placement) is available with up to 2 seams per shade at a **15% surcharge**. Splice locations are figured from the bottom hem/rail of the shade up. A 1/4" tolerance per seam in either direction is considered acceptable. This is due to the difficulty in handling the material while setting the seam.

The maximum height for custom seams is equal to the material roll width less 3". Example – 98" wide material railroaded and seamed has a maximum seam placement of 95".

Seams may be visible when the shade is fully extended. Seams will be placed as close to the tube as possible, location may varied depending upon roll width and shade height.

Although we maintain the highest quality standards, we cannot guarantee an exact pattern match at the seam on individual shades. We do not guarantee pattern matches shade to shade horizontally or vertically on multiple shade orders.

BOTTOMRAIL OPTIONS

Bottomrail/Hems

Each roller shade fabric comes standard with the fabric-wrapped rail. Alternative bottomrail styles and colors may be selected at no extra charge. Those selections must be noted on your order.

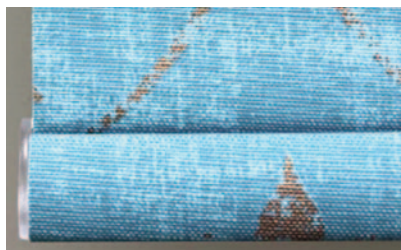

Heat sealed hem bar is highly recommended when shade is ordered with railroaded material or when shade is equal, wider than 108" or longer than 90".

Fabric Wrapped Rail (1")

Front face of rail is wrapped with shade fabric. The back face of the rail is a visible painted finish.

Colors – White, Black

Front face of rail wrapped with shade fabric; back face of rail is a visible painted finish without any fabric wrap. Includes frosted end caps.

****Fabric wrapped bottomrail comes with clear handle(s) when ordered as TouchLift Shade. Shades greater than 42" will have 2 handles.**

Deluxe Rail (1")

Painted metal rail with color-matched end caps.

Colors – White, Vanilla, Silver, Bronze, and Black

Includes color-matched end caps

Heat Sealed Aluminum Bar (1-1/4")

Aluminum bar heat sealed into a hem pocket. Pocket edges are also sealed. Heat Seal Hem bar is highly recommended on bigger dimension and when shade is request to be made with railroaded material or heavier material to improve appearance of the shades; will help reduce waviness, twisting, cupping & curling.

Not available on all styles. Please refer to the **Collection Information** section.

Heat sealed hem to back pocket edges come sealed

Flat Deco Rail (1-1/4") – effective 5/20/2019

Flat aluminum rail for simple clean look. Fabric wrapped not available.

Colors – White, Vanilla, Silver, Bronze, and Black.

Comes with clear end caps only.

PRODUCT NOTES

- **Tip to Tip Facts:**

- On an outside mount Beaded Chain Roller, the material will cover 1" less than the tip to tip width.
- See Finished Dimension charts for additional information

- **Additional Notes:**

- Minor telescoping of product is possible if shade is not installed exactly level and is considered acceptable.
- On orders with multiple shades, if one shade requires railroading, we will railroad all shades for a consistent look.
- To assure color consistency and avoid dye lot variation, please order all shades at the same time. The availability of colors is subject to change without notice.

- **To Straighten Shade:**

If your shade does not roll straight, correct as follows:
Figure A - Shade veers toward right, or left. Correct by lowering shade completely exposing the roller tube and wrapping a 1-1/2" long piece of masking tape, as shown in Figure B, on the shorter side (opposite of where it's veering). This increases the diameter of the roller slightly, acting as a straightener. Then raise and lower the shade.

If shade does not still roll straight, add a second layer of tape and repeat process. Continue to add tape until shade rolls straight.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – CLUTCH LIFT

Minimum and Maximum Standards

For shades 12" wide, maximum length is 60"

All Patterns – Minimum Width: 12" Minimum Height: 12".

Spring Assist strongly recommended on shade sizes over 80" x 80".

For TouchLift Cordless specifications, please refer to Product Specifications – Touch Lift section.

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10".

Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – POWERWAND™

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
PowerWand	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – POWERWAND™

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
PowerWand	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – POWERWAND™

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
PowerWand	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
Simplicity	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – SIMPLICITY

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
Simplicity	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
Simplicity	19"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – REMOTELIFT™ ROLLUP 28 WIREFREE

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
ST30WF	29"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Minimum:	Width	Height
ST30WF	29"	12"

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

PRODUCT SIZE SPECIFICATIONS – HARDWIRED MOTORIZATION

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Note: 110v Motorized shades are available without top treatment, with 4" R-series Fascia, or with Pocket. Maximum width for each coupled shade is 120" and maximum overall width is 216". 4" R-series Fascia & Pocket will spliced in the center when width exceed 190".

PRODUCT SIZE SPECIFICATIONS – HARDWIRED MOTORIZATION

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Note: 110v Motorized shades are available without top treatment, with 4" R-series Fascia, or with Pocket. Maximum width for each coupled shade is 120" and maximum overall width is 216". 4" R-series Fascia & Pocket will spliced in the center when width exceed 190".

PRODUCT SIZE SPECIFICATIONS – HARDWIRED MOTORIZATION

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Note: 110v Motorized shades are available without top treatment, with 4" R-series Fascia, or with Pocket. Maximum width for each coupled shade is 120" and maximum overall width is 216". 4" R-series Fascia & Pocket will spliced in the center when width exceed 190".

PRODUCT SIZE SPECIFICATIONS – HARDWIRED MOTORIZATION

Minimum and Maximum Standards

Please Note: Shade sizes that are wider than the fabric roll width indicated will be made with the fabric turned width for length (railroaded). The maximum width for non-railroaded shades is the roll width unless otherwise noted.

Fabrics turned width for length will have a visible seam when fabricated longer than their maximum roll width less 10". Fabrics turned width for length may have an edge curl. This is not considered a defect in the product.

Note: 110v Motorized shades are available without top treatment, with 4" R-series Fascia, or with Pocket. Maximum width for each coupled shade is 120" and maximum overall width is 216". 4" R-series Fascia & Pocket will spliced in the center when width exceed 190".

CLUTCHES

The Skyline™ System Clutches and Brackets from Rollease – standard on all shades (R-Series is optional)

Skyline

- Features a sleek, rounded profile that's more aesthetically pleasing
- Spring-loaded pin-end technology allows for more flexibility and ease of installation
- Internal spring arrangement provides a smoother feel when pulling the shade up and down
- Universal brackets – color coordinated to clutch (Black or White)
- Rounded end caps provide a more polished look

R-Series

- Traditional design
- Features traditional blade and end plug bracketing system
- Ideal for commercial applications

* **STRONGLY RECOMMEND** Heat Sealed Hem as the Bottomrail option for bigger shades and for Sheerweave 5000 collections to improve appearance of the shade, and minimizing waviness.

The default color for the clutches, end plugs, plastic beaded chains, tensioners, and bottomrail for all patterns is either black or white as indicated above. Vanilla and bronze plastic beaded chains and tensioners are also available as an option, and must be specified at time of order. White and vanilla chains and tensioners will be coordinated to white clutches, end plugs, and bottomrails. Bronze and black chains and tensioners will be coordinated to black clutches, end plugs, and bottomrails.

Antique brass, nickel, oil rubbed & stainless steel chains will not have similar color coordinated component set, to ensure color coordinate as desired, please review colors under each clutch components.

NOTE: There are no pre-set default colors for cassette valances, fascia, or optional Deluxe bottomrails. These colors must be specified when ordering. Default trims not selected for Phifer screen patterns.

* **STRONGLY RECOMMEND** Heat Sealed Hem as the Bottomrail option for bigger shades and for Sheerweave 5000 collections to improve appearance of the shade, and minimizing waviness.

The default color for the clutches, end plugs, plastic beaded chains, tensioners, and bottomrail for all patterns is either black or white as indicated above. Vanilla and bronze plastic beaded chains and tensioners are also available as an option, and must be specified at time of order. White and vanilla chains and tensioners will be coordinated to white clutches, end plugs, and bottomrails. Bronze and black chains and tensioners will be coordinated to black clutches, end plugs, and bottomrails.

Antique brass, nickel, oil rubbed & stainless steel chains will not have similar color coordinated component set, to ensure color coordinate as desired, please review colors under each clutch components.

NOTE: There are no pre-set default colors for cassette valances, fascia, or optional Deluxe bottomrails. These colors must be specified when ordering. Default trims not selected for Phifer screen patterns.

* **STRONGLY RECOMMEND** Heat Sealed Hem as the Bottomrail option for bigger shades and for Sheerweave 5000 collections to improve appearance of the shade, and minimizing waviness.

The default color for the clutches, end plugs, plastic beaded chains, tensioners, and bottomrail for all patterns is either black or white as indicated above. Vanilla and bronze plastic beaded chains and tensioners are also available as an option, and must be specified at time of order. White and vanilla chains and tensioners will be coordinated to white clutches, end plugs, and bottomrails. Bronze and black chains and tensioners will be coordinated to black clutches, end plugs, and bottomrails.

Antique brass, nickel, oil rubbed & stainless steel chains will not have similar color coordinated component set, to ensure color coordinate as desired, please review colors under each clutch components.

NOTE: There are no pre-set default colors for cassette valances, fascia, or optional Deluxe bottomrails. These colors must be specified when ordering. Default Trim not selected for Phifer screen patterns.

The following pages contain solar optical information by pattern and color, it is important to understand the numbers and how they work best to your advantage.

OPENNESS FACTOR (OF):

OF is a property that is often used to describe a screen material. The definition of OF is the percentage of the screen's surface area that is "open". The OF only describes one of the factors that regulates the amount of light passing through a roller shade. Blackout provides the most privacy, followed by 1%, Translucent, then 3%. Increasingly, 5%, 10%, then Transparent provide the least amount of privacy.

The OF and color coating will together decide how open the (shade) material will become. Different material colors absorb light differently. For example, a dark colored car is hotter than a light colored car on a sunny summer day.

Sunlight that hits the shade surface is divided into three parts that together make 100 % of the incoming light. The picture below illustrates the phenomenon.

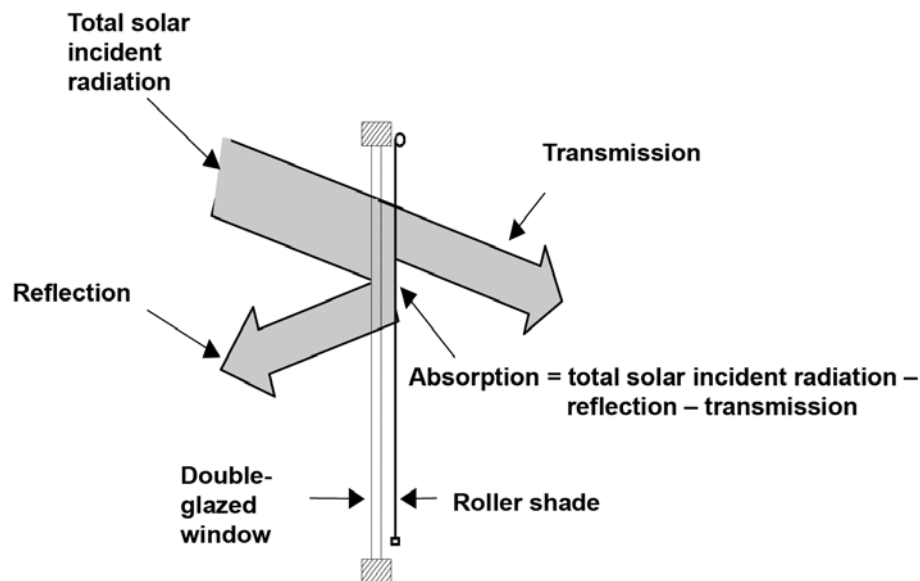

TRANSMISSION: One part of the light will pass through the shade, and that is the part of the light that comes into the room. *The lower the number, the better.*

The transmission value tells how much light passes through the fabric. The transmission is dependent on three factors;

- the openness factor of the fabric
- the color of the fabric
- the coating on the fabric.

REFLECTION: One part of the light will be reflected when it hits the shade. *The higher the number, the better.*

ABSORPTION: The rest of the light will be absorbed by the shade. *The lower the number, the better.*

UV PROTECTION (and Blackout Fabrics): The total solar incident radiation of wavelengths between 280 nm and 2500 nm is measured and optical values are reported. UV-light is included in these wavelengths. For those of our fabrics that are Blackout the transmission of light is 0 %. This signifies 100 % blocking of all sunlight, including UV-light. The UV-protection is 100 % for the fabric. In order to get complete blocking of the light the fabric has to be fitted so that no light is transmitted on the sides of the fabric. *The higher the number, the better.*

ROLLER SHADE CHARACTERISTICS

All Roller Shades are sent with complete installation instructions. These instructions include information on installing shades properly, child safety device attachments, and shade adjustments. To ensure that all shades operate properly we highly recommend you read these instructions thoroughly and understand them before installing any Roller Shade.

Although we maintain the strictest quality standards and inspect every shade before it leaves our factory, the following characteristics are considered normal and are not manufacturing defects:

- Loose fibers may appear on material edges from time to time. This is normal and does not affect the overall integrity of the shade. Simply trim off the loose fibers with a pair of sharp scissors.
- Material edges may curl inward (hourglass). This is especially noticeable on long narrow shades.
- Screen material is designed to have a clear view-through when viewing directly or on a slight angle. Waviness and distortion is characteristic when viewing from an angle of approximately 30% or more, depending on the pattern.
- Inside mount shades will have light leaks at the top and around outer edges of shades. This is especially noticeable on blackout and room darkening materials.
- Material tube deflection may occur, and a slight V shape may appear in the top and center portion of the shade, especially on shades over 120" wide. This is considered normal, providing that the material does not wrinkle when rolled up onto the tube.
- Please be aware that installing screen shades on windows that feature screens may cause a moire effect.
