Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 96" or more in width are considered oversize. Therefore, a net shipping charge of \$45 per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

FEATURES & BENEFITS

- Offered in the popular 2-1/2" vane size, ideal for any size window.
- Streamlined collection featuring both translucent and light-dimming vane styles to provide varying degrees of light control.
- Available with one of the two new motorization systems
 - Simplicity Rechargeable: Rechargeable RF motorization system provides months of use between charges (with normal use). The rechargeable battery is hidden in the rotating rail meaning no external battery pack. Solar recharge option available.
 - PowerWand: The ease of Simplicity motorization with the convenience of remote free operation. Lift and lower the shading with the touch of a button on the pendant that hangs from the front of the headrail. The rechargeable battery is charged using the charging port in pendant.
 - > To suit your customer's needs the black or white colored wand is available in one foot increments from one to five feet and can be placed on either the left or right.
- Limited Lifetime Warranty ensures your customers' satisfaction.

* Light Dimming fabrics provide category C, opaque light control because even when the vanes are completely closed they DO NOT completely seal off all incoming light.

See vane closure diagram on page 8 for a visual reference.

Note: Collections are presented alphabetically. Within each collection colors are also arranged alphabetically

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

STANDARD FEATURES

- Headrail Size: 3-5/8" x 3"
- Snap-in Bracket Style
- Cord Tilt & Lift
- Color-Coordinated Hardware

OPTIONS: NO CHARGE – SPECIFY ON ORDER

- Fabric Headrail Insert
- Tilt Only
- Control Positions (R or L)
- Spacer Blocks
- Hold-Down Brackets
- Two-On-One Headrail – price as 2 separate shades (Standard Cord Loop Only)

OPTIONS: EXTRA CHARGE

- Cordless Lift. add \$110 per shading

MOTORIZATION OPTIONS: EXTRA CHARGE

- Simplicity Rechargeable Motor add \$398 per shading
 (Charging port available on the right side only)
 – 5 Channel Remote Control
 (Black Part #CS5138 or White Part #CS5138W) add \$58 each
 – Solar Panel (Part #CS52096) add \$218 each
- PowerWand add \$160 per shading
 – PowerWand Options (must be specified):
 1) Control Side (Left or Right)
 2) Wand Color (Black or White)
 3) Wand Length:
 1 foot (12")
 2 feet (24")
 3 feet (36")
 4 feet (48")
 5 feet (60")
- Plug-in Charger (Can be used for both Simplicity Rechargeable and PowerWand) (Part #CS5199) add \$44 each

OPTIONS

FABRIC HEADRAIL INSERT

Features a coordinating fabric inserted into the front of the headrail to provide a soft fabric look from top to bottom.
(See surcharge on pricing pages)

SIDE-BY-SIDE VANE ALIGNMENT

When window shadings are installed side by side, vane alignment can be guaranteed within 1/4" only if:

- Shadings are ordered at the same time and in the identical style, color and height.
- Shadings that need to be aligned are specified on the order form (a note must be included in Special Instructions).

ADJACENT SHADINGS

To span wide window openings, window shadings may be installed adjacently, so their headrails abut. The gap between the fabric panels of the adjacent shadings varies according to the control placement, as shown in the table below.

CONTROL PLACEMENT	
Adjacent (Abutting)	Window Shadings
Left/Right Shadings	Center Gap
Right/Right Controls	3/4"
Left/Left Controls	3/4"
Right/Left Controls	1-1/16"
Left/Right Controls	1/2"
Window shadings are not recommended for bay windows or butt-and-pass applications.	

ADDITIONAL NOTES

SHADING ADJUSTMENT

Shadings should wind evenly and not skew to one side.

A balance weight on the bottomrail can easily be adjusted if the fabric winds unevenly on the roll when the window shading is raised. Uneven winding can cause damage to the edge of the fabric.

- If skewing does occur:
 - Ensure headrail was installed level; shim if necessary.
 - To release, insert a flat blade screwdriver into the weight lock and turn clockwise.
 - Adjust placement of weight in bottomrail, 1" at a time, toward side where fabric is gathering.
 - Secure the weight locks in position by turning them counter clockwise, after making the adjustment.
 - Raise shade, then lower, if necessary, adjust again.

MAGNETIC HOLD-DOWN BRACKETS

Magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Available upon request. Standard on tilt-only shadings.

STANDARD SHADING OPERATION

STANDARD SHADING OPERATION

Referring to the illustration below.

- 1) Shading in fully raised position.
- 2) Pull down on rear half of the cord loop to lower shading and open fabric vanes.
- 3) Pull down on front half of the cord loop to close vanes and raise shading.

Light Control

With the shading in the fully lowered position, the cord loop is used to adjust the fabric vanes from open to closed, and anywhere in between. Light control is at your customer's fingertips. (Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.)

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is up to 1-1/4".

Vane Closure

When the vanes of a window shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading.

Vane closure is measured as the distance between the front and rear fabric facings 6" up from the lowest point of the bottomrail, with the shading fully lowered and the vanes closed, as illustrated here. Vane closure is 5/8" for shadings under 96" in height and 7/8" for shadings over 96" in height.

PLEASE NOTE: Cord tensioner MUST be mounted to window casement or wall in order for the shade to operate.

Cordless Operation

To Lower The Shade

- Pull down on the tassel until the shade is at the desired height.

To Raise The Shade

- Gently pull down on the tassel. To raise the shade completely, simply release the tassel and the shade will roll up fully into the headrail. To raise the shade partially, when the shade is at the desired height, gently pull on the tassel to stop the shade from raising.

Optional cordless lift control only

SIMPLICITY RECHARGEABLE MOTORIZATION: OVERVIEW

Simplicity Rechargeable

- The Rechargeable Simplicity motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the inner tube.
- Rechargeable battery is included with the motor. The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis. The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted. Charging port available on the right side only.

Battery Charger

- An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering Simplicity Rechargeable Motorized shade option. The charger plugs into the charging port of the motor. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2-1/2" length x 1-3/4" deep. Sold separately.

Solar Panel Recharge Option

- Plugs in to any Simplicity Rechargeable motorized shading (does not work with PowerWand). Provides constant trickle charge to 7.4v Li-ION Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.
- Life of charge is subject to application variables such as size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

5 Channel Remote

- The remote can operate up to five shadings simultaneously, individually or in groups. Remotes and holders are available in white or black. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. To set a "Favorites" position, follow instructions provided in the installation instructions.

POWERWAND MOTORIZATION: OVERVIEW

PowerWand™ Motorization

- Shadings can be fabricated with the PowerWand Rechargeable Push Button Control option. The PowerWand Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerWand Rechargeable uses Simplicity motors and components.

PowerWand Rechargeable Shades Operation

- Press the up or down button on the pendant to raise or lower the shading to your desired position. No programming is required with PowerWand as upper and lower limits are set at the factory. If desired, upper and lower limits can be adjusted in the field.
- Please refer to the installation instructions for instructions on resetting the upper and lower limits and setting a favorites position can be programmed on-site.

PowerWand Appearance

- The PowerWand Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail.
- Pendant is 2-1/2" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerWand Options

- Wand is available in Black or White (there is no default)
- Wand is available in 1 foot increments from 1 to 5 feet (there is no default)
- Wand is available on either the right or left side of the shade (there is no default)

PowerWand Battery Life

- The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

Battery Charger

- 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering the PowerWand motorization option. The charger plugs into the charger port on the side of the pendant. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2-1/2" length x 1-3/4" deep.
