

QUICK GUIDE

AUTOMATE APP

App:

Control shades remotely, whether home or away. The Automate app is available for all Android phones, tablets and iOS devices including Apple watches and iPads.

Internet: Wireless Router

The Automate Pulse 2 does not currently support 5GHz networks. It operates on a 2.4GHz network or using a LAN connection (Cat5). Most routers are dual band and can support both network configurations.

Mobile Devices:

iOS device running iOS 11.3 or higher. Android device running 6.0 or higher.

Product Compatibility:

The Automate Pulse 2 can be used with any Automate motorized product.

General Hub Info:

The Pulse 2 will allow up to 30 devices, 20 scenes and 20 timers on a single hub.

Scenes and Timers:

Personalize shade control and organize how your shades operate by specific daily events. Set and forget. Lower, raise and activate shade scenes automatically at the optimal time.

Scalable:

Connect multiple hubs together for a whole home control.

Easy to use:

3 Step set up. Power on, download the app, connect and enjoy.

Connected Living:

Utilizing time zone and location, the pulse 2 can automatically raise or lower automate shades according to the position of the sun.

Intuitively control Automate shades with simple voice commands through Google Assistant, Amazon Alexa, or Apple Home Kit.

Compatibility with third party automation systems including Control4, Savant, Crestron, AMX, Elan and Homeseer.
