V 1.2.2

HIGHLAND PARK
ROMAN SHADES & DRAPERY

Measuring for your shade

INSIDE MOUNT
Measure at the 6 positions shown (3 horizontal, 3 vertical) and record the smallest dimension as the 'Recess Size'. (e.g. in PIC 1 your width measurement will be 36" and your length measurement is 60"). Provide the width measurement first. **Note: A 1/2"deduction will be taken. DO NOT order with deduction.**

OUTSIDE MOUNT
Decide where the shade will be fitted outside of the window opening. Check for any obstructions such as a window sill or window handle. Start with the width and measure the area you want the shade to cover, we recommend an overlap of at least 4" on each side.

For the length measure at least 4" above and below the window (if space allows). Record both measurements and order an **Exact fitting** and we make the shade to fit the window area. (e.g. in PIC 2 width measurement will be 36" and length measurement will be 60").

1 = 36"

2 = 36.125"

3 = 36.25"

Inside Mount

1 = 60"   2 = 60.10"   3 = 60.25"

1 = 36"

2 = 36.125"

3 = 36.25"

Outside Mount

Inside Mount

4" overlap

1 = 60"   2 = 60.10"   3 = 60.25"

Measuring for your shade - Bay Windows

ANGLED BAY WINDOWS

The trick to measuring angled bays is to make a template.
Follow our step-by-step guide:

Step 1. Find the head rail depth of your chosen shade in the chart provided (please refer to the previous page "measuring your shades – Square Bay Windows").

Step 2. Place two pieces of paper together. Using the head rail depth as your measurement, mark each piece of paper with a line in the same position.

Step 3. Position your pieces of paper on the window sill and ensure both the line marks meet up as shown.

Step 4. Using a pencil, mark the window sill where the edge of the paper meets the sill.

Step 5. Do this for both corners of the bay.

Step 6. Measure between each section as shown below. This will determine the width of each shade needed. All shades should be ordered as exact. (A, B & C measurements)

Step 7. For the length measure from where you want the top of the shade to be down to the sill or floor.

Depth of head rail

e.g. roller classic measure 55mm

A

B

C
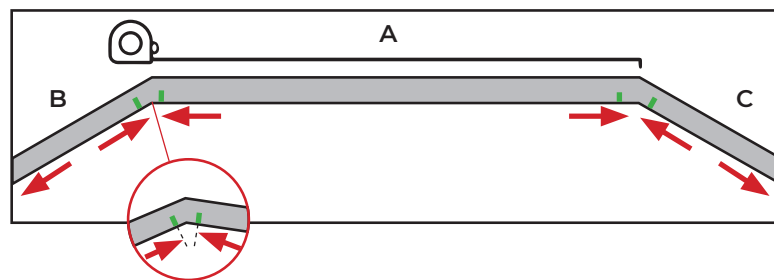

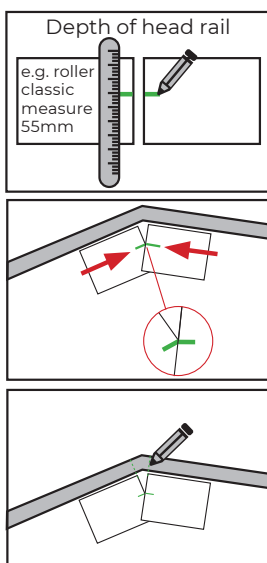

TIP!
For both the width and length measurements, measure in three places for each window. For the width, measure top, middle and bottom and for the length measure left, middle and right. Your window might not be even, so always give us the smallest measurement.

Measuring for
Drapery

Measuring for your width

DRAPERY TRACK
Measure from end to end and record this as your width, as shown in PIC 1.

DRAPERY TRACKS WITH AN OVERLAP
Measure the width track (PIC 2) and add the track overlap dimension to the overall track measurement to give a final measurement. (e.g. 40" + 4" + 4" = 48").

About Overlaps & Returns:
- First measure the bracket to bracket width of your window.
- Add overlap on Pleated Panels (NO OVERLAP ON GROMMETS):
  - 4" - two-way draw pair
  - 2" - one-way draw panel
  - 0" - stationary panels
- Choose none (0") or 3" or 6" for returns:
  - Two-way draw will be applied to outside edges
  - One-way draw will be applied to draw side
  - Stationary Panels will be applied to outside edges

EX: French Pleated Panels:
Window: 132"W bracket-to-bracket
- Enter your bracket to bracket measurement: 132"W
- If you have selected pair, this must include a 4" overlap
- Choose your returns: 6", for pair x 2 = 12"
Add these together: 132 + 4 + 12 = 148" Total Finished Width
(Total Finished Width determines price)

DRAPERY POLES
Measure between the two finials and record this as your width measurement, as shown in PIC 3. (e.g. 3 1/3").

Measuring for your height

GROMMET HEADING DRAPES
Measure from the top side of the pole to the desired length and record as your length measurement. Measure in three places (left, middle and right) and record the shortest measurement. (e.g. PIC 1 your measurement will be 60").

Note: Eyelet drapes will fit poles up to 1-3/8" (1-1/2" grommets) or 1-7/8" (2" grommets) in diameter. The overall length will be made 1-1/8" longer to allow the drape to stand off the pole. There will always be an even number of grommets per drape.

FRENCH PLEAT HEADING DRAPES
First decide whether you want to cover the track/pole with the drapes, or if you want the drapes to sit under the track/pole (on the ring).

Cover Track/Pole: Measure from the top of the track/pole to where you want the drapes to finish. Measure in three places and provide the shortest measurement. (e.g. PIC 1 your measurement will be 60")

Under Track: Measure from the ring or hook down to where you want the drapes to finish. Measure in three places and provide the shortest measurement (e.g. PIC 2 your measurement will be 160")

Ripple Fold: A ripple fold header needs a special track to create the ripple fold effect. The track will be visible when fitted. Measure from where the top of the track will be fitted down to your desired drop. Measure in three places and provide the shortest measurement.

ROMAN SHADES & DRAPERY
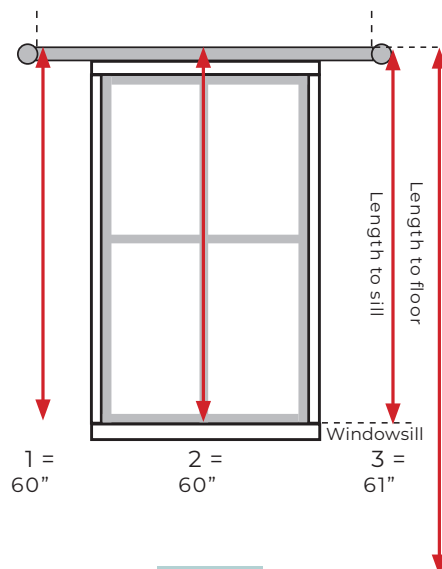

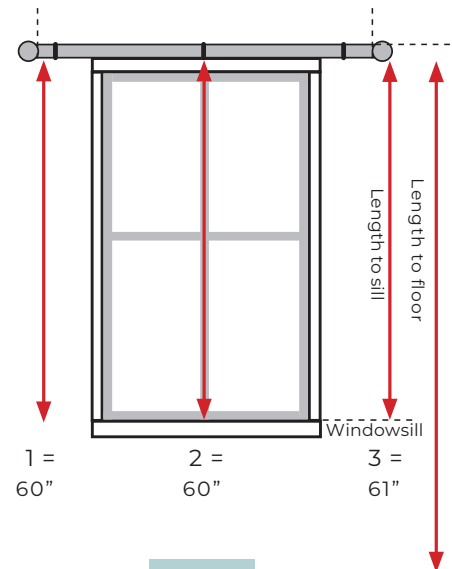

Measuring for your pole or track

Always follow the measuring and fitting instructions provided with the pole or track.

If there is space around the window, we recommend an overlap of 8"-12" at each side and above the window (e.g. A, B, C measurements).

Note: We strongly advise you to measure and fit your track before measuring for drapes.

Measuring for your bay window

MEASURING THE WIDTH FOR A BAY WINDOW

Without a track or pole in position:
If a pole or track needs to be fitted, follow the manufacturers recommendations on how to measure and fit. Each manufacturer will have slightly different instructions on measuring and fitting the track or pole.

Once the track or pole is fitted, or if you already have one in position, follow the instructions below:

DRAPERY TRACK
Measure from end to end (PIC 1) and record this as your width measurement

DRAPERY POLE
Measure between the two finials (PIC 2) and record this as your width measurement

Note: Not all poles for bay windows are suitable to have eyelet heading draperys. This is due to the way the pole is fixed to the wall. Please check corners/joins to ensure grommets can be fed along the pole.

Measuring for your bay window

MEASURING LENGTH FOR GROMMET HEADING DRAPERIES

Measure from the top side of the pole to the desired length and record as your length measurement. Measure in three places (left, middle, and right window) and record the shortest measurement. (e.g. PIC 1 your measurement will be 60").

Note: Grommet draperys will fit poles up to 1-3/8" in diameter. The overall length will be made 1-1/8" longer to allow the drapery to stand off the pole. There will always be an even number of grommets per drapery.

MEASURING LENGTH FOR PINCH PLEAT HEADING DRAPERIES

First decide whether you want to cover the track/pole with the drapery, or if you want the draperys to sit under the track/pole (on the ring).

Cover Track/Pole: Measure from the top of the track/pole to where you want the draperys to finish. Measure in three places and provide the shortest measurement. (e.g. PIC 1 your measurement will be 60").

Under Track: Measure from the ring or hook down to where you want the draperys to finish. Measure in three places and provide the smallest measurement (e.g. PIC 2 your measurement will be 60").

General Tips

GENERAL TIPS FOR MADE-TO-MEASURE DRAPERY

1. If you have ordered a pair, always clean them together and remove any hooks before cleaning.
2. To make your new drapery look their best, we recommend they are lightly steamed, taking care not to use exessive pressure or heat, to remove transport creases.
3. Some grommet drapery may have grommet impression marks on the fabric. If necessary, use a steamer or warm iron to remove them. Do not use excessive pressure or heat as this can distort the fabric.
4. Due to the packing methods on drapery, velvets and pile fabrics may have creasing and pressure marks which should disappear over a short time.
5. We pride ourselves on excellent quality. All drapery is inspected and photographed prior to packing and dispatching to ensure your order arrives perfectly.

6. **All drapery will have 3/8" deducted from the length measurement provided to allow the fabric to stretch and settle.**
7. All drapery can be professionally dry cleaned. Each drape will have a care label sewn into the side hem. Using the upholstery brush on a vacuum cleaner will help keep the draperys looking brighter and cleaner for longer.
8. All drapery are custom made to the dimensions provided at the time of ordering. Refunds and exchanges cannot be given on Made to Measure drapery that have been ordered incorrectly.

Note: This product may require additional dressing and steaming after installation.

**Available only as Flat Roman, when ordered as a Roman Shade.

Shown as Roman Stack
Zoom showing horizontal stitch

Classic Pleat

Ribs are sewn into pockets on the back of the shade. There will be a seam on the front of the shade where each pocket is sewn. Classic Pleat shades provide maximum window view.

Stacking Options: Roman Stack (Default) or Condensed (Optional)

Shown as Roman Stack

Flat Roman

Flat Roman shades utilize the stab-stitch method in which seams are minimize to provide a clean appearance when lowered, but retain an effortless stack when raised. Flat Roman shades have a 5% surcharge.

Stacking Options: Roman Stack (Default) or Condensed (Optional)

Shown as Roman Stack

Hobbled

Hobbled shades are made with extra fabric in each fold, allowing them to keep the folded look of a Roman shade even when fully lowered. Hobbled shades have an additional surcharge of 10%.

Stacking Options: Roman Stack only

HIGHLAND PARK
ROMAN SHADES & DRAPERY

Valance

Standard shades have a 6" valance on the front of the shade that is detachable by means of a velcro fastening. Valances are inclued and required on standard shades. For waterfall shades, valances from the liner are standard on the back of the shade. Valances on waterfall shades, ordered with clutch or twin-pull control, have cords hidden behind the shade.

All waterfall shades with valances, with or without returns, have a 10% surcharge.

Returns

Outside mount shades are recommended to be ordered with valance returns on Classic and Flat shades. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed. Return depth is 3". Standard shades with a valance have returns made shorter than valance length to accommodate the stack of the shade.

All valance returns are made with a Velcro affixed return in place, creating a clean, finished corner.

Hobbled Shades: A separate valance must be ordered whether configured as a standard shade or waterfall.
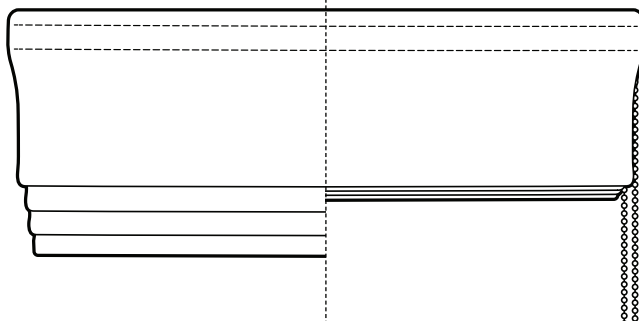

Shown as Waterfall with Returns

Roman Stack

Condensed Stack
(Available on Waterfall only)

Stacking

Highland Park Roman Shades are offered in two stack options: Roman and Condensed. Roman Stack shades provide the traditional look of Roman shades and feature pleats in a cascading fashion. Condensed Stack Roman Shades tuck the majority of the shade up into the top pleats, providing the maximum view through the window. **Condensed Stack is only available with waterfall shades.**

Roman Shade
Manual Control

August 2023
V 1.2.2

HIGHLAND PARK
ROMAN SHADES & DRAPERY

CLUTCH

Standard clutch style operation with a continuous metal bead chain loop that rotates a clutch to raise and lower the shade. Affixed to the loop is a Child Safty clip for clamping the chain loop to the wall.

Chain Color Selections

| Black (Plastic) | Brass | Nickel | White (Plastic) |

TWIN PULL

A child safe design where 2 metal twin pulls are free hanging and one operates to lower the shade, the 2nd operates to raise the shade.

Color: Silver Only

Standard length is 2/3 of shade height.

SLOW RISE CORDLESS

Promises a smooth cordless child safe operation. Lifting and lowering the shade from a central pull location. The speed of the lift can be regulated by turn of the dial on the tube for slower or quicker operation.

Grommet

Large Grommet
2"
Diameter

Small Grommet
1-1/2"
Diameter

Grommet Colors

Silver   Gold   Antique   Gunmetal

OPTION	DESCRIPTION
Maximum Size Available	(W) 251" x (L) 236"
Minimum Sizes Available	(W) 31" x (L) 12"
Fullness	170%
Single/Pair	Drapes are made in pairs as standard unless advised otherwise
Stitching Type (For Lined Drapery)	Bag lined method (Side Hems)
Stitching Type (For Lined Drapery)	Shade stitch method (Bottom Hems)
Left/Right Hem Size	1-1/2"
Bottom Hem Size	3"
Buckram Width	4"
Lining Stitching	Sewn within side hems, bag lined
Grommet Colors Available	Silver, Gold, Gunmetal, Antique
Grommet Sizes Available	1-1/2" or 2"
Maximum Pole Diameter	1-1/2" Grommet – 1-3/8" pole / 2" Grommet – 1-3/4"pole
Number of Grommets used per width	8 (Always an even # of grommets)
Grommet Position	1-1/8" from top of drape (from top inner side of grommet)
Distance between each eyelet	4" to 5"
Weighted Corners	1.5g weight in each corner (2 per drape)
Thread Color	Color coordinated to the face fabric
Manufacturers Tolerances	3/8" - 1/2"
Fitting Type	Pole
Measurement Type	Length = Pole to hem
Fabric Return	3-1/8" from eyelet centre to finish point. For bigger returns, please specify on the order.

Note: This product may require additional dressing and steaming after installation.

HIGHLAND PARK
ROMAN SHADES & DRAPERY

How to Order Drapery:
1. Select Your Style. Refer to pages 29-34 for complete specifications.
2. Find the finished width, which includes returns and overlaps.
3. Once you determine your finished width, locate your price based on the length of the shade.
4. Add your heading specification surcharge to the fabric price
5. Select your lining. Classic lining is included in base price.

All drapery is lead weighted, free of additional charge.
Classic lining included in price.

How to Care for Roman Shades & Drapery

Following some simple tips to care for a shade or drapery
will ensure they look at their best for longer.

ROMAN SHADES

We recommend Roman Shades are cleaned with
the upholstery brush on a vacuum cleaner. The
fabric part of the shade can be dry cleaned as a
last resort, please follow the below steps:

Step 1
Ensure the fabric part of the shade is laid flat (not
retracted) on a clean, flat surface.

Step 2
Remove the fabric part of the shade from the
headrail/cassette by detaching the velcro strip
either on the front .

Step 3
Turn the shade over (face side down), carefully
unclip the clear plastic hooks on the cords from
the plastic anchor on the shade.

Step 4
The fabric part of the shade is now fully
removed from the headrail/cassette and
ready for dry cleaning.

Step 5
To reattach, follow the same process as above
in reverse. Ensure the cords are fully extended
so the maximum drop is achieved.

DRAPES

All drapes can be professionally dry cleaned.
Each drape will have a care label sewn into
the side hem. Using the upholstery brush on a
vacuum cleaning will keep the drapes looking
brighter and cleaner for longer. Linings cannot
be removed for cleaning.

Adjustable Hook: All French Pleat drapes come
with this adjustable hook.

Vertical
Adjustment
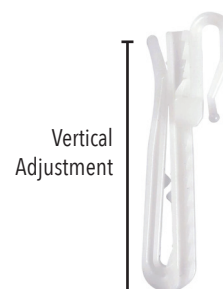

Note: This product will require additional dressing and
steaming after installation.

All prices are exclusive of sales tax. TEXTON reserves the right to withdraw or discontinue any product or alter the prices shown in the price list without prior notice to the customer. The piece price relates to full pieces only. Any cut length balance for orders in excess of a piece will be charged the cut length rate.

Stock Allocation
Minimum cut 6.5' in length. Goods can not be reserved. Any goods ordered on a pro–forma account are not allocated until the account is paid. Please be aware that if an account is on stop any goods allocated on a back order may be reallocated to other customers.

Third Party Deliveries
All deliveries to a third party address must be confirmed in writing. All deliveries must be examined and signed for as accepted in good condition. If the goods are returned to us by the carrier because no one is in to accept the delivery a second delivery charge will be charged.

Faulty
Goods may be replaced at the sole discretion of the Company. Goods are supplied on condition that the liability of the Company for the fault, defect, description or fitness for the purpose is limited to an amount not exceeding their original purchase price. The Seller's liability in respect of the goods supplied shall not extend to the Buyers loss of profits, increased cost of working or any other consequential or financial losses.

Inspection
All claims for damage, shortage, or error must be notified to the Company within 7 days of delivery. Please advise your customer/third party before cutting or third party processing. It is the responsibility of the buyer their customer or third party delivery to inspect the goods on delivery (and in any event before such goods are cut, made or hung) in respect of design, color, batch number, condition, quantity and quality. The Seller shall not be obliged to replace goods once they have been cut, made or hung.

Returns
No goods to be returned without prior agreement. The seller reserves the right of discretion at all times to accept / refuse the return of any goods supplied. A standard handling charge of 20% plus the cost of carriage will be made for returning goods otherwise authorised. Cut or treated fabrics will not be accepted for return or credit.

Shipping Condition
Please note, fabrics may have creases from packing. It is recommended that products be carefully steamed to ensure perfect results.

Pattern Repeats, Joined Widths & Pattern Alignment
Please note pattern repeats of all fabrics can vary by +/- 5%, we cannot guarantee exact measurements. Please ensure that pattern alignment is adequate to produce a satisfactory result. Textiles are not completely stable. It is always possible that the pattern will not be completely `square` on the cloth. Whilst every effort is made to avoid distortion, a commercial tolerance is to be accepted. Please check the pattern alignment is acceptable before cutting and making we do not accept claims after the goods have been cut or sewn.

Color Matching
Whilst every effort is made to ensure your order will color match the samples and pattern books we must point out that an exact match cannot be guaranteed. Should a close match be required the buyer must request a stock cutting for approval prior to ordering. Please note that none of our fabrics are guaranteed against fading

Fabrics used as Drapes
When held against the light fabrics cannot be guaranteed to be free of visible flaws.

Movement of Drapes In it's Original Place
All fabrics are liable to shrinkage; therefore it is important that an allowance (5%) is allowed when making up. Atmospheric conditions such as temperature and humidity can vary. This may affect drapes when hung uncoventionally. Cellulosic yarns, viscose, or rayon and natural fibres such as cotton and linen may shrink or relax due to changes in humidity. Heavy fabrics and loose weaves may relax and lengthen. Drapes should always be made with adequate hem, loosely tacked. Side seams or attached linings should be hand slipped to allow for differential movement between face and lining fabrics. Always use a appropriate thread for the fabric you are sewing. We recommend avoiding exact length drapes, i.e Sill or floor touching and do recommend over length drapes. All drapes must be made with the possibility of making adequate adjustments in the event of any movement in the drapes. Any adjustments remain the responsibility of the maker. Movement of drapes in situ cannot be accepted as a fault in the fabric and claims will not be accepted.

Silk & Linens
Please note that silk and linen will contain small color variations and weave slubs, causing differentiation of densities when held against the light. This is not a defect. Silk is unsuitable for any type of loose covering or tight upholstery. The dyes used are vegetable based and are therefore particularly vulnerable to fading in direct sunlight. Impurities in the air also cause fading. Special care should be taken to ensure that the leading edges of the drape are turned away from the window and are faced into the room. We recommend lining and interlining when making up silk drapes. Linen has a natural characteristic to crease.

Metallic
Some of our designs have a deliberate Gold or Silver antique metallic over print. There will be variations in shade and differentiation of densities when used on any textiles such as linen or silk and any fabric with a velvet pile.

Pocket Weave
Pocket weaves have a complex construction. Two layers of the fabric woven simultaneously and joined with the chenille / cotton yarn to create the design
of the fabric. This technique gives a slightly quilted look to finished drapes which is characteristic of this construction. We recommend a sample is always requested prior to ordering.

Sheers & Voiles
Fully joining the widths is not recommended. The normal accepted way is to join the widths at the top of the tape, to weight the bottom and to leave the drops loose and not sewn together.

Flocks, Velvets & Pile Fabrics
The rolls of fabric should not be dropped or stored on end as permanent creasing will result. All textured or pile fabrics may flatten. Piles may distort.
Slight color variations may occur between each batch

Title of Goods & Copyright
All products remain the sole property of the Seller until full payment has been made. All designs, drawings, etc are the Sellers copyright. Any infringement of which is actionable in law.

Washing & Cleaning
Always follow the washing and cleaning instructions. Detergents containing optical brightening agents will make dark, and pastel shades appear lighter. Colored items should be washed separately.

Composition Codes
A – Acrylic CL – Cotton Linen P – Polyester R – Rayon V – Viscose
B–Bamboo K – Kationic PO – Polyamide S – Silk C – Cotton L – Linen

Quality Concerns
(a) Complaints on quality will only be considered provided notice in writing is given to us within 7 days after you first have a reasonable opportunity to examine the goods and the defective goods are placed aside for inspection by our representative. This shall be a condition precedent to the giving of any credit or allowance in respect of or replacing the goods alleged to be defective. (b) Our liability in respect of goods proved by you to be defective is limited to giving you a reasonable credit or allowance in respect of (or at our option to replacing at the point of delivery specified overleaf) the goods, but in no circumstances will our maximum liability hereunder exceed the invoice value of the defective goods. (c) in particular, we shall not be liable for:– (i) adverse effects resulting from the application to the goods of any process, operation or treatment unless specifically recommended by us and we have agreed to be so liable, nor (ii) for any goods which have been cut or partly cut or processed by you in any way or damaged after the risk in the goods has passed to you. (iii) any expenditure incurred by you in respect of goods proved or alleged to be defective, nor (iv) loss of profit nor for consequential loss of any kind to you, however caused. (d) Claims for loss or damage will only be considered if made within seven days as will enable a valid claim to be made against the carrier. (e) Contract goods may only be returned to us if so agreed by us and our certificate as to the quantity of returned goods received by us shall be final and binding. (f) In the event of your failure to give us notice as specified in Paragraph (a) or (d) above, your claim shall be deemed to have been waived and shall be absolutely barred. (g) Where a complaint or a claim has been made in respect of goods proved or alleged to be defective we may suspend further deliveries of goods under this contract until the validity of such complaint or claim has been finally determined and in such event the applicable delivery date(s) shall be postponed accordingly. (h) If on or after delivery we make an allowance to you in respect of any claim and such allowance is accepted by you, no further claim may be made by you in respect of that matter. (i) A 20% handling charge will be levied on all goods returned where delivery was affected in accordance with our customers original instructions.

Limited Lifetime Warranty

Texton, Inc. warrants that Roman Shades & Drapery will be free from defects in materials and workmanship for as long as the original retail purchaser owns the product, provided that products were properly installed in residential dwellings and products were made or assembled exclusively from TEXTON materials and components.

The obligation of Texton, Inc. is limited to repair or replace the shadings or components found to be defective, and excludes shipping charges and labor costs for measuring, fabricating and installation. Repairs will be made with like or similar parts. This warranty does not include any conditions or damages resulting from accidents, alterations, exposure to elements (which could cause, among other things, the fading of shade colors), misuse, abuse, motorized devices, or failure to follow our instructions with respect to measurement, installation, cleaning or maintenance.

- This warranty does not cover damage to shade fabrics as a result of using window cleaners or similar substances, which could cause discoloration of the shades.
- This warranty does not cover any condition or damage resulting from removal of the shade and reinstallation in the same or another window.
- This warranty does not apply to conditions caused by normal wear and tear upon the product.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER OBLIGATIONS, LIABILITIES OR WARRANTIES. In no event shall Texton, Inc. be liable or responsible for INCIDENTAL OR CONSEQUENTIAL DAMAGES or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion or limitation may not apply to you.

Child Safety

Our Shades are designed with child safety as a priority. To reduce the risk of strangulation, our fabrication methods incorporate features to comply with the current ANSI cord safety standard. Fabrication methods include breakaway cord stops, Cord-Shield cording, and tension devices.

To further reduce the risk of accidents, all cords should be kept out of reach of children. Cord cleats can help implement this essential precaution and are therefore included with all standard cord lock/pull cord Roller Shade products.

For Roller Shades made with a clutch operating system our tension device is designed and is to be placed and shipped so that, unless it is properly installed (or altered from the shipped condition with sequential process or tools), the tension device prevents the shade from operating. The tension device once installed can help prevent children from pulling cords around their necks.

Motionshade Motorization Warranty

Coulisse's Motion Motors offers a 3 year warranty on all motors and controls. Specifically, Coulisse warrants its motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 3 years commencing with the date stamped on each product. If the Coulisse product fails wi thin this 3 year period, Coulisse will repair or replace it free of charge through your end product supplier. Batteries are not covered by this warranty.

Somfy Motor Warranty

Somfy offers a 5 year warranty on all motors and controls. Specifically, Somfy warrants its motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Somfy product fails wi thin this 5 year period, Somfy will repair or replace it free of charge through your end product supplier. Batteries are not covered by this warranty.

Volta Motor Warranty

Texton & RollEase Acmeda warrants its AC and DC wired motors and electronic accessories to be free from defects in materials and workmanship for 7 years, and warrants battery powered DC motors to be free from defects in materials and workmanship for 5 years when installed properly and operated under normal use from the date stamped or affixed label on each device.

If a Rollease Acmeda motor and electronic accessory is found to be defective and covered by the warranty, we will, at our option, repair or replace it free of charge. Repairs or replacements will be made with like or similar parts and products, and exclude the cost of removal and reinstallation. This product warranty does not cover any conditions or damages resulting from misuse or abuse, accidents, alterations, neglect, damage by others, natural disasters, exposure to the elements, or failure to follow Rollease Acmeda instructions with respect to installation, use and maintenance.

The repair or replacement of defective product is the purchaser's sole remedy and the limit of Rollease Acmeda's obligation. EXCEPT AS EXPRESSLY PROVIDED IN THIS PARAGRAPH, ROLLEASE ACMEDA MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND, NATURE OR DESCRIPTION, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY OR FITNESS OF ANY PRODUCTS FOR ANY PARTICULAR PURPOSE, AND HEREBY DISCLAIMS THE SAME. In no event shall Rollease Acmeda be liable or responsible for incidental or consequential damages or for any other direct or indirect damage, loss, cost, expense or fee. To return products for inspection and, if the condition or damage is covered by the warranty, repair or replacement, contact us for a return goods authorization (RGA) number, and then ship the parts in question back to Rollease Acmeda, freight charges pre-paid. Rollease Acmeda will inspect and repair or replace any covered, defective items and return them freight pre-paid.

WARRANTY Exclusions:
- Installation and usage are not in accordance with our installation and operating instructions.
- Product has been opened, dismantled or returned with clear evidence of abuse or other damage.
- Product has been used to perform functions other than the functions it was designed to handle, namely motorizing windowattachments (e.g., shades, rolling shutters, and awnings).
- Product is used with electrical accessories (switches, relays, etc.) that have not been previously approved in writing by the Rollease Acmeda Innovation and Design Center.
